Tasks

- Review use case diagram, state transition diagram and Interfaces (Basic comments see the next page)
- Update the document by
  - Revising diagrams according to comments
  - Finish the state transition diagrams for all use case diagrams and the interfaces.
- Submission (both GitHub and iSpace, ONE group only ONE document):
  - Parial SRS with required content
  - Deadline
    - Section 1001: 11:55 pm, 19 Mar 2019
    - Section 1002: 11:55 pm, 20 Mar 2019

Basic Comments

- Miss numbered labels in UI

- The buttons in state transition diagram cannot be found in UI

- Event[condition]/action

- Sone buttons in UI cannot be found in state diagrams

- Some states cannot go anywhere (crash)

- Some states are missing (e.g. when add recipe, there should be page for the input of details)

- Too much words in the diagram

- Some information in UI is un-necessary

- The confirmation window with only one button can be reduced as an action.
